

Clip Mouse

**The Clip Mouse is the only mousing platform that lets users adjust their mousing position in all three dimensions for maximum comfort.**

With height, depth, lateral and tilt adjustability, the Clip Mouse can be positioned where it's needed for truly custom support.

It can also be easily moved from one side of the keyboard to the other for left- or right-handed use.

***Designed by George Mileos***

*His award-winning designs for the office environment include workstations, task seating, and a dictating machine, part of the Museum of Modern Art's permanent collection. His 2G and 4G keyboard mechanisms for Humanscale revolutionized the product category and remain the industry standards.*

## HEIGHT ADJUSTMENT

For users who do not use their keyboard's numeric keypad, the above keypad position allows mousing as close to the body as possible to relieve neck and shoulder stress. Alternatively, the side position at keyboard height minimizes wrist extension for a comfortable and safe mousing experience.

Side Position

Above Keypad Position

## DEPTH/LATERAL POSITION

Platform rotates around an offset mount and slides on track to offer 11" of depth and 6" of lateral adjustment for custom positioning.

## TILT

Independent 30° tilt keeps mousing surface level while keyboard is in negative slope.

Profile View

## LEFT/RIGHT USE

Easily switches from left to right without tools to support both left- and right-handed users.

## ADDITIONAL INFORMATION

- 8.5" or 10" diameter mouse platform
- Optional Gel mouse pad eliminates contact stress on base of palm while mousing and protects wrist from platform edge
- Product Codes:
  - 90 Standard Height 8.5" Platform
  - 90H High 8.5" Platform (for Taller Keyboards)
  - 91 Standard Height 10" Platform
  - 91H High 10" Platform (for Taller Keyboards)
