FEATURES

- Unlike most two-leg sit/stand desks, eFloat Quattro's refined four-leg frame removes the bulky understructure—offering clean lines, greater stability, and a furniture-first presence.
- Thoughtfully designed to maximise usable surface space, the Smart Channel* positions tools like monitor arms and task lights ergonomically, while neatly routing cables and wires.
- Integrated into the worksurface, the digital hand switch allows users to adjust height with a single touch and includes two programmable memory presets.
- Worksurface options include a variety of sizes, colours, and materials, ranging from solid wood to powder-coated MDF finishes.
- Matching the desk frame colour, the Vertical Cable Clip neatly conceals and secures up to two cords* along the height of the desk's leg.
- Designed with sustainability in mind, eFloat Quattro features PVC-free cables, and powder-coated MDF surfaces formaldehyde-free—prioritising safer, low-emissions materials.
- Designed exclusively for eFloat Quattro, the optional eFloat Quattro Cable Manager is a lightweight, basket-style system that organises cables and power strips beneath the work surface.

*Smart Channel option only available with Powder-Coated MDF and Solid Wood surfaces.

**Fits up to two standard width (0.4 in / 10.7 mm diameter) cables.
